

Summary

Tools-focused C# developer (M.Sc. Computer Science) shipping UI-heavy applications and internal workflow tools. Comfortable owning features end-to-end: discovery with end users, rapid iteration, pragmatic hardening, and documentation. Game-dev/XR background (Unity) informs tooling that serves content creators.

- Built internal workflow tooling (Xamarin.Forms + XAML UI + MySQL) for public sector operations; improved resolution speed 30-40% and reduced procurement costs up to 20%.
- Shipped a production retail app and platform (catalogs, offers, loyalty) with strong focus on clarity, usability, and iterative delivery.
- XR/game-dev: Lead Developer on EU-funded VR4LL 2.0 (VR language learning) and published ARnet (AR network-simulation + guided lessons) on Google Play. Maintain an ongoing systems-heavy Unity project (RyftRealm) with weekly devlogs.

Education

M.Sc. Computer Science & IT — University of Maribor	2020 - 2024
B.Sc. Computer Science & IT — University of Maribor	2016 - 2020

Work Experience

AI Workshop Instructor & Advisor	AI workshops / Telemach, Slovenia	2025
	JobLab, Slovenia	

Delivered professional AI workshops; ran discovery and prioritization (value/feasibility/risk). Helped teams define MVP scope and workflows for adoption.

High School Professor	School Center Velenje, Slovenia	2021 - 2024
------------------------------	--	--------------------

Taught 200+ students across AI, Web, Multimedia, and Networks (95% pass rate). Built a Python AI grading assistant (~20% grading-time reduction). Supervised software projects and shipped prototypes via 5+ game jams.

Technical Assistant	Ministry of Public Administration, Slovenia	2019 - 2020
----------------------------	--	--------------------

Modernized IT across 100+ facilities; improved resolution speed 30-40% and reduced procurement costs up to 20% via process improvements and workflow tools (Xamarin.Forms + XAML UI + MySQL).

Software Developer Intern	Mega M d.o.o., Slovenia	2018 - 2019
----------------------------------	--------------------------------	--------------------

Built an e-commerce platform and cross-platform mobile app (Xamarin.Forms/XAML). Implemented catalogs, offers, and loyalty features; discount notifications increased engagement by ~30%.

Skills & Approach

Core Tooling	C#, .NET, XAML (Xamarin.Forms), SQL (MySQL), REST integrations, Git
Game/XR	Internal workflow tools; UI design for productivity; debugging; maintainable, testable code; iteration loops with end users
Delivery	Unity (XR/AR/VR), editor tooling & content pipelines, Cinema 4D, Photoshop (asset iteration and creator-first workflows)
	MVP-first iteration, stakeholder interviews, documentation & handover; security-aware tradeoffs

Selected Projects

VR4LL 2.0 — EU-funded VR language-learning project (Unity/XR)

- Lead Developer; shipped VR learning experiences with tight stakeholder feedback loops, emphasizing robust systems, UX clarity, and pragmatic iteration.

ARnet — Published AR educational app (Unity)

- Published AR network-simulation app with guided lessons and interactive learning flow on Google Play.
