Slovenia (EU) - Open to remote / Berlin

Unity XR Developer (C#) | VR Training | Human-Centered AI

Summary

Unity/C# XR developer (M.Sc. Computer Science) building VR training and learning simulations with stable performance on standalone headsets and mobile.

- Shipped VR training: lead developer on VR4LL 2.0 (EU-funded Erasmus+), translating learning goals into scenario-based interactions.
- Performance + UX: profiling, interaction tuning, and production-minded debugging to keep experiences smooth on device.
- Human-centered AI: deliver AI workshops and advise teams on responsible use (privacy, transparency, value-first use-cases).

Education

M.Sc. Computer Science and IT - University of Maribor (2020 - 2024)

B.Sc. Computer Science and IT - University of Maribor (2016 - 2020)

Work Experience

AI Workshop Instructor & Advisor

2025

AI workshops / Telemach JobLab | Slovenia

- Delivered hands-on AI workshops (LLMs, prompting, practical automation); coached participants from idea to safe MVP.
- Advised organizations on responsible AI adoption: use-case selection, privacy constraints, rollout risks, and measurable value.

High School Professor (Software/IT)

2021 - 2024

School Center Velenje | Slovenia

- Taught 200+ students across AI, web, multimedia and networking; mentored project teams.
- Built a Python-based AI grading assistant for assignments (approx 20% time saved) and improved course tooling.

Software Developer Intern

2018 - 2019

Mega M d.o.o. | Slovenia

- Built core architecture and UI for a Xamarin retail app (login, API integration, data presentation); shipped to users.

Skills and Approach

Unity/XR	Gameplay systems, tools and UI; component architecture; ScriptableObjects; XR interaction debugging; profiling.
AI (ethical)	Workshops, LLM workflows, privacy-first rollouts, guardrails and transparency in user-facing features.
Visual/UX	UI layout and polish; materials and lighting; Animator integration; particles and VFX hookups.
Workflow	Git (branching/PRs, diff reviews); reproducible bug reports; remote collaboration.

Selected Projects

VR4LL 2.0 (Unity/XR, Erasmus+) - vr4ll.com

- Lead developer; shipped VR learning modules with robust interactions and performance-aware setups for standalone headsets.

ARnet (Unity AR, Google Play)

- Built and published an AR network-simulation learning app with interactive 3D content and guided lessons.

Languages

Slovenian (native), English (fluent)
