

# Aleš Spital

## Unity Developer (C#) | Mobile Gameplay Systems | Performance & Tooling | XR/AR

Mobile: +386 31 314 310 | ales.spital@gmail.com | linkedin.com/in/ales-spital | alesspital.github.io | Slovenia (EU)

### SUMMARY

Unity/C# developer (M.Sc. Computer Science) building production-ready gameplay systems with a strong focus on performance, iteration speed, and creator-friendly tooling. Lead software developer on EU-funded VR4LL 2.0, shipping multiplayer VR learning environments for Meta Quest. Published ARnet on Google Play; currently building RyftRealm, a mobile-first, data-driven game prototype.

### SKILLS

Unity (Unity 6/2022+), C#, component architecture, ScriptableObjects, prefabs/scenes, UGUI; gameplay systems (economy, inventory, progression-friendly data); Unity Editor tooling & content pipelines; Profiler-driven optimization (memory/GC, physics tuning, mobile/Quest constraints); real-time multiplayer sync (networked physics, avatar IK/finger sync, voice chat); Git, REST integrations, SQL (MySQL), Xamarin.Forms/XAML.

### EXPERIENCE

#### Lead Software Developer (Unity/XR) - VR4LL 2.0 (EU-funded Erasmus+ project)

Tehnološki park Ljubljana (TPLJ) • Hybrid | 2023-2025

- Shipped **3 VR learning environments (VLE1-VLE3)** for partner testing on standalone VR devices (Meta Quest), prioritizing UX clarity and stability.
- Implemented **advanced multiplayer** for the virtual lab: voice chat, real-time object manipulation/state sync, and synchronized scenario progression.
- Delivered **networked physics + avatar presence**: networked rigidbodies/collision simulation, full-body IK, and finger movement synchronization.
- Optimized for Quest performance: baked/static lighting with probes, profiling-led budgets, bandwidth-efficient replication, and release-ready build hygiene.

#### Additional experience

- **AI Workshop Instructor & Advisor** - JobLab/Telemach (2025): ran hands-on workshops; helped teams scope MVPs and ship practical workflows.
- **High School Professor (Software/IT)** - School Center Velenje (2021-2024): taught 200+ students; supervised software projects and rapid prototypes.
- **Technical Assistant** - Ministry of Public Administration (2019-2020): built Xamarin.Forms + XAML + MySQL tools; improvements reported to cut resolution time 30-40% and procurement costs up to 20%.
- **Software Developer Intern** - Mega M d.o.o. (2018-2019): shipped Xamarin retail app features (login, API/UI); discount notifications increased engagement ~30% (reported).

### SELECTED PROJECTS

- **RyftRealm** (Unity, mobile-first): data-driven economy (sell rules, shop buy rules, restrictions), inventory services, housing placement, and editor tooling for fast iteration.
- **ARnet** (Unity AR, Google Play): AR network-simulation learning app with guided lessons and interactive 3D device interactions.

### EDUCATION & LANGUAGES

**M.Sc.** Computer Science & IT - University of Maribor (2020-2024) | **B.Sc.** Computer Science & IT - University of Maribor (2016-2020)

Slovenian (native) • English (fluent)
