

Education

M.Sc. Computer Science and Information Technologies , University of Maribor, Slovenia.	2020 – 2024
B.Sc. Computer Science and Information Technologies , University of Maribor, Slovenia.	2016 - 2020

Work Experience

High School Professor	School Center Velenje (Slovenia)	2021 – 2024
Taught 200+ students across courses in AI, Web Development, Multimedia, and Computer Networks, achieving a 95% student pass rate and strong course satisfaction.		
Collaborated with EU initiatives to provide training for educators, enhancing digital competencies in education.		
Organized 5+ Game Jam events and supervised the development of an RPG game and a AI grading assistant using Python, enhancing project-based learning and reducing grading time by 20%.		

Technical Assistant	Ministry of Public Administration Slovenia	2019 – 2020
Contributed to modernizing IT infrastructure across 100+ Slovenian government facilities, achieving up to 20% cost savings through centralized procurement and improving IT service resolution times by 30–40%.		
Designed software solutions using Xamarin and MySQL to enhance archival processes and streamline organizational efficiency.		

Software Developer Intern	Mega M d.o.o. (Slovenia)	2018 – 2019
Developed an online shopping platform using HTML, jQuery, and Bootstrap, along with a Xamarin mobile app for a national grocery chain, leading to a 30% increase in customer engagement through loyalty point integration and real-time discount notifications.		

Web Developer Intern (Erasmus exchange)	bits & bytes (Malta)	Spring 2015
Contributed to the design and development of an online platform for an electronic device retailer, gaining deeper knowledge of HTML, CSS, PHP, and MySQL.		

Other Work and Skills

Web Development: Created websites, portfolios, e-commerce platforms, and blogs utilizing Git, Node.js, EJS, Ionic, JavaScript, Bootstrap, PHP, SQL and MongoDB.

Video and Photo Editing: Edited promotional materials, handling photo and video formats using Photoshop, Premiere Pro, After Effects, Blender and Cinema 4D.

Mobile games: Developed and published various mobile games and RPGs as a hobby using Unity, C# and Photoshop, refining my skills and deepening my understanding of graphics pipelines and optimization techniques.

Projects

ARnet (AR application for learning computer network)

- Unity AR application enabling users to simulate and explore network topologies, the TCP/IP model and various network device types, enhancing student understanding – resulting in a 20% improvement in average grades.
- Acquired proficiency in tailoring development processes by adapting to specific user requirements and improving intuitiveness while advancing expertise in ARFoundation, ARCore and ARKit.

The AR Tourist Guide

- Developed a Unity application for the Municipality of Šoštanj to visualize the submerged village of Družmirje in AR, enhancing cultural engagement for over 1,000 tourists annually and supporting local heritage preservation efforts.

Event eCommerce Website (<https://sebastjanspital.si/>)

- Developed a Laravel based blog and an eCommerce website that allows users to view upcoming performance events and purchase tickets via Stripe, resulting in a 40% increase in ticket sales.
- Integrated an online shop for purchasing merchandise, fully supported by Stripe for secure transactions.
- Designed the frontend using Bootstrap for a responsive and implemented SEO to enhance visibility.
