

As a recent computer science graduate from Slovenia, I am excited to transition from teaching to a software engineering career, with a strong focus on AR/VR development. My passion for merging programming with immersive technologies drives me to create engaging real-life experiences. Proficient in web development, Unity, C# and various aspects of 3D and 2D graphics, including animation and modeling, I bring adaptability and a readiness to tackle new challenges to every project.

Work Experience

Middle School Professor	School Center Velenje Velenje, Slovenia	Sep 2021 - Present
• Taught a diverse array of subjects, encompassing Artificial Intelligence, Web Development, Multimedia and Computer Networks. • Developed an augmented reality (AR) mobile application aimed at enhancing students' comprehension of IP addressing and routing within computer networks. • Engaged in collaborative efforts with European Union initiatives aimed at modernizing educational systems. Facilitated the creation and delivery of specialized training sessions for educators, focusing on the integration of contemporary digital tools and technologies. • Strategically planned and executed diverse projects catering to student engagement and development, including initiatives such as Game Jam events, the creation of an RPG computer game and the implementation of AI-assisted exam correction systems.		
Technical Assistant	Ministry of Public Administration Slovenia Ljubljana, Slovenia	2017 - 2018
• Contributed to the modernization of IT infrastructure within Slovenian government facilities by providing strategic support and implementing innovative solutions. • Designed and developed software solutions tailored to enhance archival processes and streamline organizational efficiency.		
Software Developer Intern	Mega M d.o.o Velenje, Slovenia	2019 - 2019
• Designed and developed an online shopping platform that made it easier to order products. • Created a mobile application for the well-known grocery chain that provides users with up-to-date information on loyalty points and discount prices, increasing user happiness and engagement.		
Web Developer Intern	bits & bytes Birkirkara, Malta	Spring 2015
• Erasmus Student Exchange Program Participant • Contributed to the design and development of an online platform for an electronic device retailer.		
Freelance Work		
• Web Development: Developed a diverse array of websites, including portfolios, e-commerce platforms and blogs. • Video and Photo Editing: Recorded and edited advertising and introduction assets, adeptly navigating both photo and video formats.		

Technologies and Languages

- Languages: Python, C#, C++, JavaScript, jQuery, NodeJS, PHP, SQL
- Technologies: AR/VR, Git, Machine Learning, AI
- Tools: Unity, Blender, Cinema 4D, Photoshop
- Other: Video and Photo Editing, 3D Modeling and Animating, Teaching

Education and Certifications

- **M.Sc. Computer Science and Information Technologies**, University of Maribor, Slovenia. **2020 - 2024**
- **B.Sc. Computer Science and Information Technologies**, University of Maribor, Slovenia. **2016 – 2020**

Projects

Augmented Reality Projects

ARnet

- Developed a mobile application as part of my master's thesis, facilitating learning about computer networks through augmented reality.
- Enabled users to explore and simulate fundamental concepts such as network topology, device types, IP networking and routing.
- Serves as a valuable educational tool for students, enhancing understanding and engagement with complex network concepts.

The AR Tourist Guide

- Designed and developed for the Šoštanj, Slovenia municipality to enhance the tourist experience.
- Empowered tourists to visualize the former appearance of the submerged village of Družmirje, enriching their understanding of local history and culture.

Mobile Games

- Developed and published a variety of mobile games and RPGs as a personal hobby.
- Utilized projects to refine skills, deepen understanding of graphics pipelines and optimization techniques, resulting in improved performance and visual quality of games.
- Demonstrated creativity and dedication in a rewarding journey of growth and accomplishment within the gaming industry.

2D and 3D Graphics Projects

- Produced promotional graphics using Adobe Photoshop to support marketing campaigns.
- Enhanced visual effects in videos by editing and incorporating CGI elements using Adobe Premiere.
- Edited videos in Adobe Premiere to create engaging promotional content.
- Undertook personal projects to further develop proficiency in Adobe Photoshop, Premiere Pro, and Cinema 4D for editing and creating graphical content.

Interests

- I am passionate about exploring challenging topics such as quantum theory, quantum computing, future technologies, and the intricacies of the human mind.
- Delving into complex subjects provides me with intellectual stimulation and a continuous drive to deepen my understanding and knowledge.
