Fisher & Paykel Healthcare Limited
15 Maurice Paykel Place
East Tāmaki, Auckland 2013
New Zealand

Dear Fisher & Paykel Healthcare Limited,

As a recent graduate with a master's degree in computer science, I am eager to transition from my role as a high school teacher to a position that aligns more closely with my technical skills and interests. I have a passion for creating video games and AR/VR technology, which allows me to apply my coding knowledge to bring imaginative ideas to life. This creative drive has led me to undertake projects such as digital art using Photoshop and Blender/Cinema 4D, as well as developing mobile video games and AR experiences in Unity (C#).

I have been creating such projects for several years, mostly as a personal hobby, and I've managed to publish some of them, reaching a smaller audience. Additionally, I've participated in larger projects where I learned the importance of project management, time management, version control, and communication. Some of my publicly available projects can be seen on my portfolio: alesspital.github.io.

I believe this would be an excellent opportunity to broaden my horizons and deepen my expertise. This opportunity would complement my decision to apply for New Zealand's Slovenia Working Holiday Visa, which would allow me to come to your location and work in New Zealand for a year, including this internship. This opportunity is highly significant to me, and I am confident that I can offer valuable contributions through my eagerness to grow and learn, innovative ideas, experience, and unique perspective.

Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to your team.

Sincerely,
Aleš Spital
