

Aleš Spital

UNITY/XR & PRODUCT ENGINEER

Velenje, Slovenia | EU citizen | +386 31 214 310 | ales.spital@gmail.com

linkedin.com/in/ales-spital | alesspital.github.io | github.com/AlesSpital | Open to remote, hybrid, and relocation

Unity/XR and product engineer with an M.Sc. in Computer Science, combining immersive development, production web engineering, and technical education. Current work spans Quest 3 mixed reality at Kore Meta; previous delivery includes multiplayer Meta Quest work for VR4LL 2.0 and the published ARnet learning app. Brings 5+ years of production JavaScript experience and 1,000+ learners taught or trained, with a focus on turning complex systems into usable products.

CORE SKILLS

Unity/XR: Unity, C#, Meta Quest / Quest 3, mixed reality, AR Foundation, multiplayer interaction sync, ScriptableObjects, custom editor tooling, profiling and Quest optimization

Software: JavaScript, React/Vite, Node.js/Express, REST/JSON APIs, SQL/MySQL, PHP, Git/GitHub Actions

Delivery: product architecture, rapid prototyping, mobile development, performance tuning, Vitest/Playwright, technical direction, stakeholder communication, AI-assisted development

PROFESSIONAL EXPERIENCE

Unity/XR Developer | Kore Meta Inc. (remote)

Mar 2026 - Present

- Develop Unity features, content workflows, optimization, and bug fixes for Multiverse Kaitenzushi, a mixed-reality Japanese-learning product for Meta Quest.
- Built data-oriented tooling with ScriptableObjects, custom inspectors/editor windows, reusable prefabs, and JSON/configuration to make content iteration faster and more consistent.
- Coordinate planning, technical reviews, and cross-discipline work across a 10-person team; profile and optimize Quest 3 builds toward a 72 FPS target.

Senior JavaScript Developer | RSLabs, Slovenia

Sep 2020 - Mar 2026

- Built and maintained production JavaScript/jQuery features, frontend/backend integrations, and product-facing workflows.
- Owned refactoring, optimization, maintainability decisions, and full-cycle delivery from problem analysis through implementation and iteration.

Unity/XR Developer & Independent Product Builder | Freelance

2025 - Present

- Delivered VR4LL 2.0 Meta Quest modules with shared interaction and object-grab synchronization, quest-based learning flows, and standalone-VR optimization.
- Build and maintain independent products across Unity, mobile, and full-stack web, including eMind and RyftRealm; operate contract work through Aleš Spital s.p. since 2026.

Technical Educator / AI Workshop Instructor | Slovenia

2021 - Present

- Taught computer science at School Center Velenje (2021-2024) and continue to deliver practical AI/technical workshops for schools, adults, and business audiences; 1,000+ learners taught or trained.
- Designed project-based materials and mentored student research that earned national silver recognition in 2024.

Earlier experience: Technical Assistant - Ministry of Public Administration (2019-2020); Software Developer Intern - Mega M (2018-2019); Web Developer Intern - bits & bytes, Malta (2015).

SELECTED PRODUCTS & RECOGNITION

ARnet - Published and maintained Android AR networking simulator, developed through master's research and used for interactive networking education.

eMind - Live AI/XR learning platform with browser-based AR authoring, built as an end-to-end full-stack product.

RyftRealm - Creator and lead developer of a step-driven mobile MVP where device step history powers realm restoration, home furnishing, and companion progression; POPRI 2026 and Social Impact Award Slovenia 2026 finalist.

EDUCATION

M.Sc. Computer Science and Information Technologies - University of Maribor, FERİ | 2024 | Thesis: Learning computer networks with augmented reality

B.Sc. Computer Science and Information Technologies - University of Maribor, FERİ | 2020 | Thesis: Augmented reality based tourist guide
